

Silicon Bronze Wire for TIG Welding

## ຄຸນສນບັດ

TIG-BRONZE-SI ເປັນລວດທອງເໜືອງທີ່ມີສ່ວນພົມຂອງຊີລິກອນ ໃຫ້ໃນກະບວນກາເຊື່ອມ TIG (GTAW)

## ການໃຊ້ຈານ

ສໍາຮັບເຊື່ອມຕ່ອທີ່ອຮອງພື້ນໄລທະທອງເໜືອງ ອີເລືອກ ໄລທະພົມຂອງທອງແດງ ແລະ ຍັງສາມາດເຊື່ອມຕ່ອເໜີກຫີ້ອເໜີກ ທີ່ລົກກັບທອງແດງຫີ້ອທອງເໜືອງໄດ້ ນອກຈາກນີ້ຍັງສາມາດໃຫ້ເຊື່ອມຕ່ອເໜີກຫຼັກລວາໃນໆໄດ້ ໃນຂະນະເຊື່ອມຕ້ອງຄວບຄຸມ ກາຮແພ່ງກະຈາຍຂອງຄວາມຮົວນ ໃຫ້ອູ່ໃນຮະດັບຕໍ່າ ແລະ ໄນຈໍາເປັນຕົ້ນຄຸນຫຼັງຈາກກ່ອນ

## DESCRIPTION

TIG-BRONZE-SI is silicon bronze welding wire to be used in TIG (GTAW) welding process.

## APPLICATIONS

For welded joints and surfacing welds on copper-zinc alloys and on low alloy cuprous metals. Also used to weld base metals of steel and cast iron to copper, brass, and bronze. Maybe used to weld on galvanized steel. When making joints in silicon bronze, the low thermal conductivity must be taken into consideration. Preheating of the parent metal (silicon bronze) is not usually necessary.

### Typical chemical composition of weld metal(wt%)

Cu	Si	Sn	Mn	Fe	Zn
>95	3	0.01	1	0.05	0.01

### TYPICAL MECHANICAL PROPERTIES OF WELD METAL

Tensile Strength	Elongation
560 N/mm <sup>2</sup>	40%

### SIZE AVAILABLE AND RECOMMENDED CURRENTS(DC+)

Size (mm)	Current (A)	Argon Flow (LPM)
1.6 X 1000	70~150	15
2.4 X 1000	150~200	15
3.2 X 1000	230~400	20
