

FEATURE #1

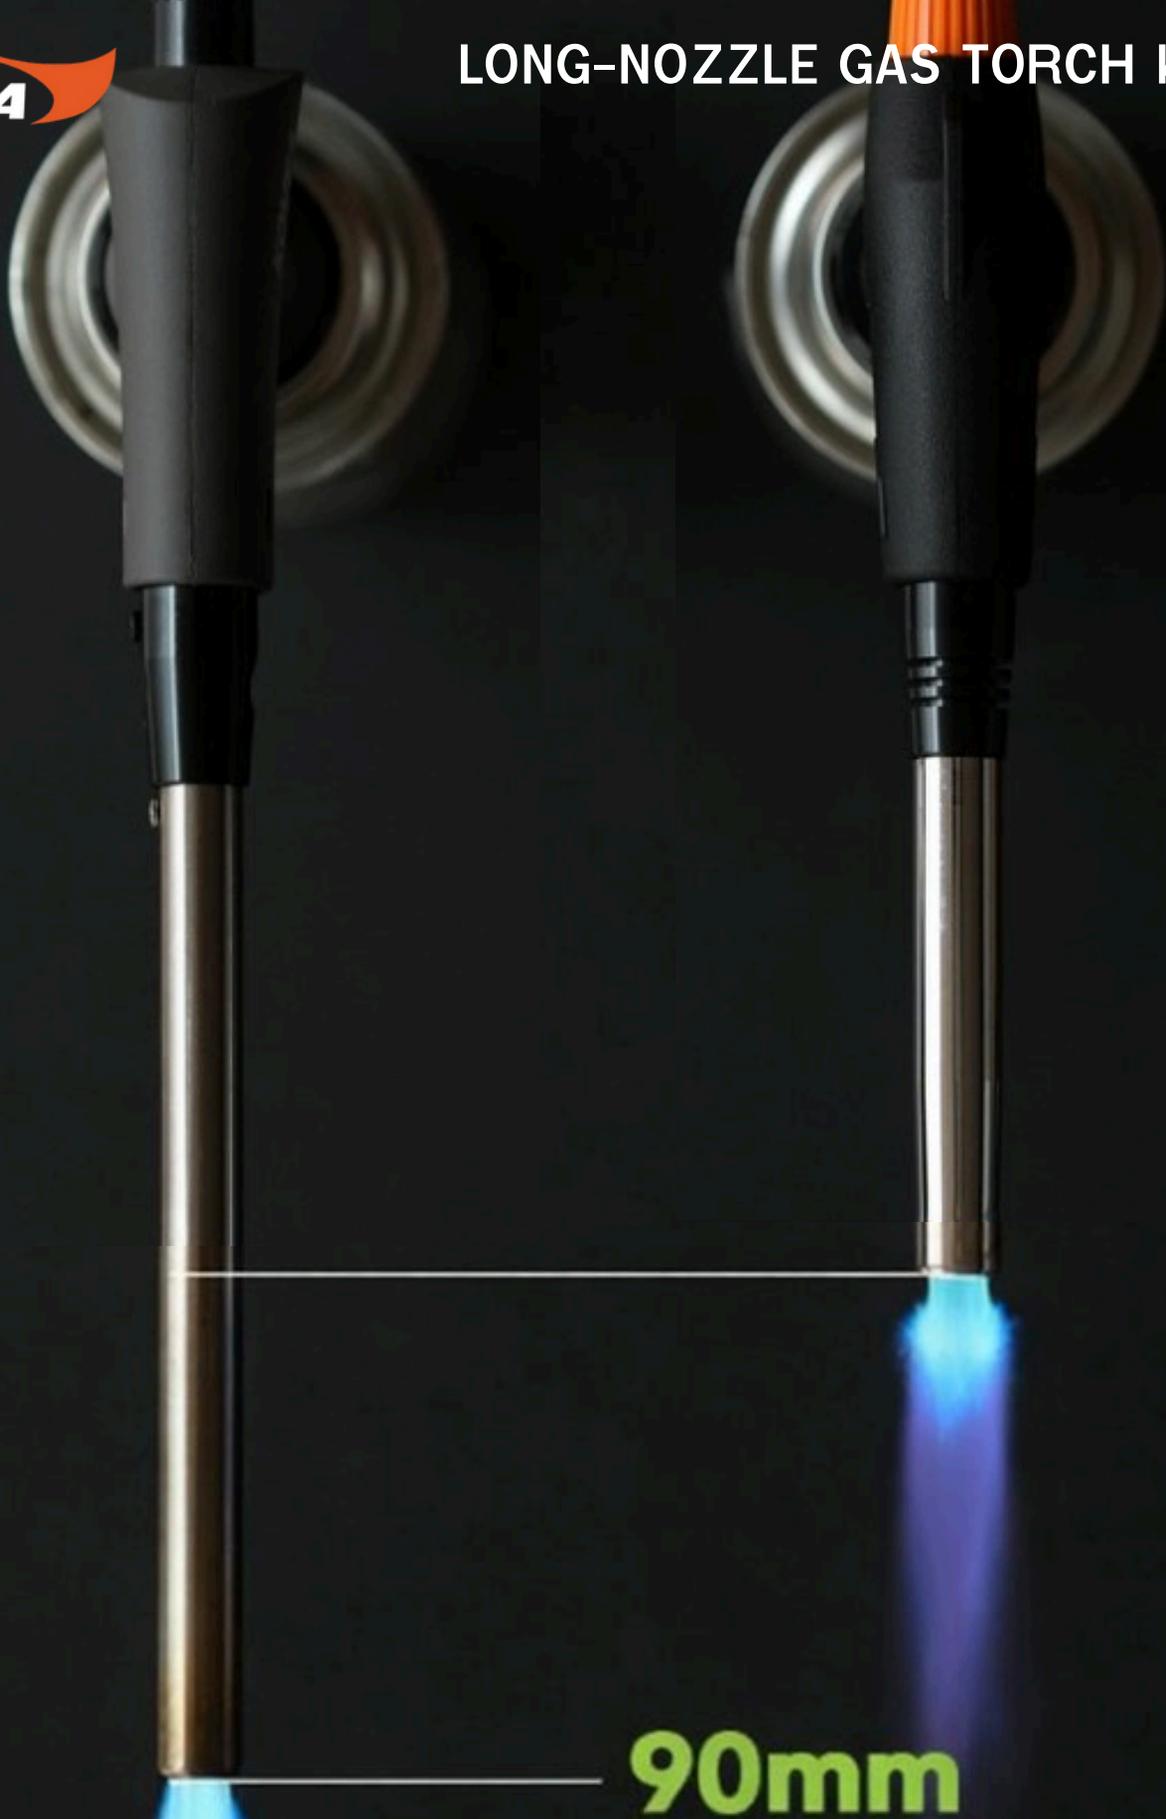

Concentrated Cyclone High Heat

With a powerful concentrated cyclone heat of 1,600°C, it is capable of various tasks including copper alloy welding.

FEATURE #2

Anti-Liquefaction System

Typhon X is the world's smallest copper alloy welding torch with a built-in anti-liquefaction system that can be used with butane gas. It allows for safe operation at any angle.

FEATURE #3

Longer Fire Nozzle

The Typhoon X's long nozzle (160mm) is 90mm longer than our previous model. It provides a safer distance for a more secure and comfortable user experience.

FEATURE #4

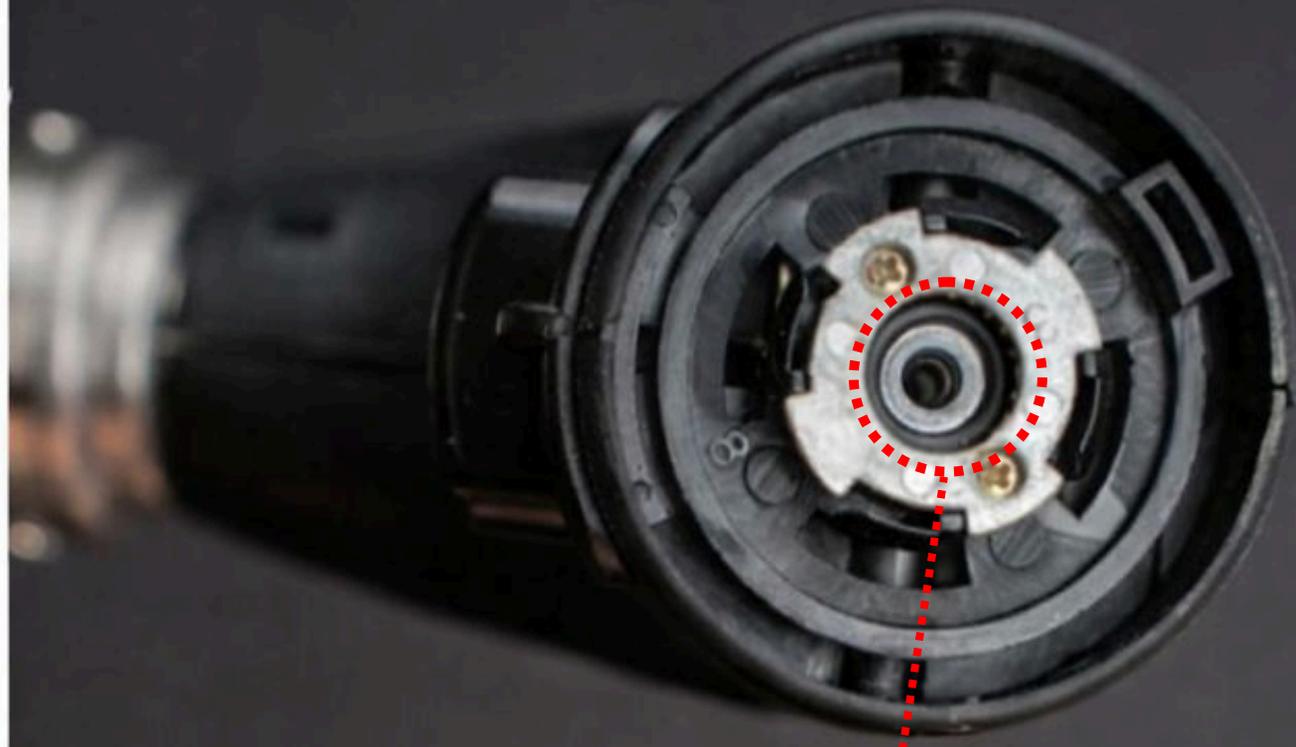

Solid Durability

Designed to reduce hand fatigue even during long periods of use, it provides a comfortable grip. Made from ABS material that is resistant to heat and external impact, it boasts exceptional durability.

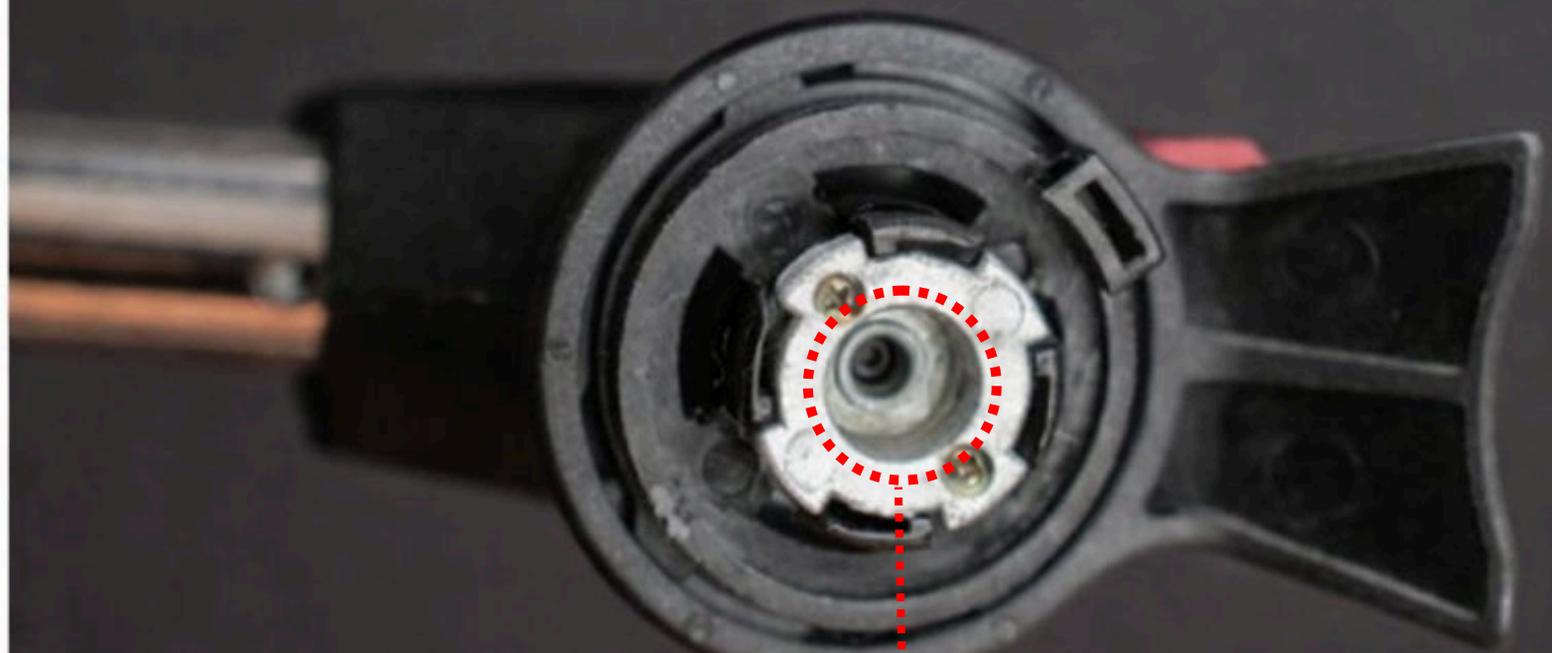

FEATURE #5

Gas Leak Shut-off Function

Equipped with gas leak shut-off packing, it provides a double-layered barrier to prevent gas leaks caused by gas defects or damage.
